## CONTENTS

<i>Acknowledgments</i>	v
<b>1 Learning to Read and Write 1938–57</b>	<b>1</b>
<i>Nobody ever writes two books – My parents – Hitler occupies Denmark – Talking in kindergarten – A visionary teacher – The class newspaper – “The topic” – An elite high school – Variety of teachers – Chemical experiments – Playing tennis with a champion – Listening to jazz – “Ulysses” and other novels.</i>	
<b>2 Choosing a Career 1957–63</b>	<b>17</b>
<i>Advice from a professor – Technical University of Denmark – Ørsted’s influence – Distant professors – Easter brew – Fired for being late – International exchange student – Masers and lasers – Radio talk – Graduation trip to Yugoslavia – An attractive tourist guide – Master of Science – Professional goals.</i>	
<b>3 Learning from the Masters 1963–66</b>	<b>35</b>
<i>Regnecentralen – Algol 60 – Peter Naur and Jørn Jensen – Dask and Gier Algol – The mysterious Cobol 61 report – I join the compiler group – Playing roulette at Marienlyst resort – Jump-starting Siemens Cobol at Mogenstrup Inn – Negotiating salary – Compiler testing in Munich – Naur and Dijkstra smile in Stockholm – The Cobol compiler is finished – Milena and I are married in Slovenia.</i>	
<b>4 Young Man in a Hurry 1966–70</b>	<b>59</b>
<i>Naur’s vision of datalogy – Architect of the RC 4000 computer – Programming a real-time system – Working with Henning Isaksen, Peter Kraft, and Charles Simonyi – Edsger Dijkstra’s influence – Head of software development – Risking my future at Hotel Marina – The RC 4000 multiprogramming system – I meet Edsger Dijkstra, Niklaus Wirth, and Tony Hoare – The genius of Niels Ivar Bech.</i>	
<b>5 Shaping a New Field 1970–72</b>	<b>81</b>
<i>Alan Perlis invites me to spend a year at Carnegie-Mellon – Emigration to America – Niklaus Wirth defines Pascal – Driving home in a blizzard – Discussing the future of concurrent programming in Marktoberdorf and Belfast – Alan Perlis tells stories – Mad King Ludwig and Thomas Edison – The first modern book on Operating System Principles.</i>	

<b>6</b>	<b><i>Inventing the Future 1972–76</i></b>	<b>103</b>
	<i>Can you tell me, what is Caltech? – Sunshine and palm trees in February – Wine-tasting with the dean – Driving across America – A question of priority – Two baffling problems – That sounds easy – Concurrent Pascal and Solo – Al Hartmann’s compiler – The art of compromise – Getting a sore throat in Bombay – Returning to Marktoberdorf – The distraction of grants – Leaving the magic kingdom – A passion for clear thinking.</i>	
<b>7</b>	<b><i>The End of an Era 1976–84</i></b>	<b>131</b>
	<i>The legendary Zohrab Kaprielian – Football game at the Rose Bowl – Creating a top department at USC – How Harvard grants tenure – The first book on concurrent programming – Doctor techniques – Surviving the executive vice president – Designing the Edison multiprocessor for Mostek – United Technologies kills the project – Let no man complain to me – Brush fire and mud slides in Altadena – Magical simplicity – What we achieved.</i>	
<b>8</b>	<b><i>Danish Interlude 1984–87</i></b>	<b>153</b>
	<i>Student democracy and teaching in Denmark – Danish industry uses Concurrent Pascal – Consulting for GN Corporation – Rocking the boat.</i>	
<b>9</b>	<b><i>Back in America 1987–2004</i></b>	<b>163</b>
	<i>Distinguished professor at Syracuse – Birthday celebration in the former Danish West Indies – Becoming an American citizen – Parallel scientific computing – A personal supercomputer – Parallel cryptography – History of programming languages – The Computer Pioneer Award – Final words.</i>

## ACKNOWLEDGMENTS

For helpful comments on my story, I thank Len Adleman, Birger Andersen, Sven Eriksen, Jon Fellows, Nissim Francez, Steve Goings, Sol Golomb, Christian Gram, Jonathan Greenfield, Al Hartmann, Nils Havsteen, Charles Hayden, Niels Zeuthen Heidam, Giorgio Ingargiola, Henning Isaksson, Konrad Jahn, Jørn Jensen, Anita Jones, Peter Kraft, Paul Lindgreen, Aage Melbye, Peter Naur, Børge Ring, Charles Simonyi, Leif Svalgaard, Fred Thompson, Villy Toft, Peter Villemoes, Paul Waltenburg, and Bill Wulf.

My special thanks go to Charles Hayden, who helped me publish this book on the internet, and Jim Horning, who read all the chapters. And to Børge Ring for translating excerpts from a Dutch trip report by Edsger Dijkstra.

I am grateful for permission to quote from the following material:

The personal letters of Jonathan Fellows, Steve Goings, Al Hartmann, Charles Hayden, Jim Horning, Giorgio Ingargiola, Anil Menon, Villy Toft, Niklaus Wirth, and Tom Zepko.

Klasseavisen (“The class newspaper”) 1945–45, Konrad Jahn’s class at Niels Ebbesenvej School, Frederiksberg, Denmark. (Excerpts translated from Danish by Per Brinch Hansen.)

E. W. Dijkstra, EWD316A, Reisverslag van Edsger W. Dijkstra aan Summer School, Marktoberdorf, juli 1971 (in Dutch). © 1971 by Maria C. Dijkstra-Debets. (Excerpts translated from Dutch by Børge Ring and Per Brinch Hansen.)
